Shareware is an exciting marketing method which allows you to try top-quality software before you pay the author. With Shareware, you won't be disappointed paying lots of money for a program that's not right for you. The small fee you pay covers only the duplication and distribution costs, and permits you to EVALUATE this fully-functional program. If you continue to use it, you must send the author an additional payment which may entitle you to: technical support, free or discounted upgrades, bonus programs, and more. Your payment supports authors, allowing them to continue writing newer and better Shareware programs.
